Press report, Public Opinion Barometer (BOP). 3rd wave 2019

Summary

Level of confidence:	95%
Variance:	p=q=50%
Sample size:	1,500 individuals
Sampling error:	± 2.53%

Scope: Catalonia

Univers: Spanish citizens of 18 years of age and more who live in Catalonia

Method of data collection:

Computer Assisted Personal Interview (CAPI)

Sampling points:

73 municipalities and 223 census sections

Sampling procedure:

Multistage, stratified by province and size of the municipality with random selection of the primary sampling units within strata (municipalities within each province) and the secondary sampling units (census sections) within the selected municipalities, with selection of last sample units (individuals) using sex, age and place of birth crossed quotas.

Town size is divided into 6 categories: less or equal to 2,000 inhabitants; from 2,001 and 10,000 inhabitants; from 10,001 and 50,000 inhabitants; from 50,001 and 150,000 inhabitants; from 150,001 and 1,000,000 inhabitants; more than 1 million inhabitants.

To calculate the quotas we use the official statistics from the *Padró continu de població* from the year 2018. The age quotas correspond to the following intervals: 18 to 24 years of age; 25 to 34 years of age; 35 to 49 years of age; 50 to 64 years of age ; 65 and more years of age.

Sample size:

1,500 interviews with the following distribution by province:

- Barcelona 1,120
- Girona 141
- Lleida 84
- Tarragona 155

Allocation:

Proportional.

Sampling error:

The overall margin of error of the survey is **± 2.53%**, for a confidence level of 95% (1.96 sigma) and under the assumption of maximum indetermination ($p=q=50\%$). In each province the margins of error are:

- Barcelona ± 2.93
- Girona ± 8.25
- Lleida ± 10.69
- Tarragona ± 7.87

Fieldwork:

The fieldwork has been performed by GESOP. Gabinet d'Estudis Socials i Opinió Pública, SL from the 14th of November to the 5th of December 2019.

Methodological note:

1. Given that we have only drawn a sample from the population (those over 17 years of age, living in Catalonia and with Spanish citizenship), all results are subject to a sampling error, meaning that not all the differences in the same questions with respect to other waves of the Barometer are statistically significant.

For instance, in a survey question where the 50 % (the worst-case scenario in terms of the margin of error) gives a particular response, the “true” value in the population would fall into the range of +2.53 of the results in the sample. This is, if we were to repeat many times the same survey with the same characteristics, we would guess the “true” value 95% of the times if it was said it was in between 47.47% and 52.53%.

The subsamples coming from the cross-tabulations between different variables are subject to a wider margin of error. As a result, the conclusions that could be derived from such cross-tabulations with very small subsamples have to be treated with caution.

2. When presenting results of questions 38 and 39 we have grouped the different political parties or coalitions from the point of view of parliamentary groups appeared after the 21st of December elections to the Catalan Parliament 2017. The results of this grouping are:

Junts per Catalunya = CDC + Democràcia i Llibertat + PDeCAT + Junts per Catalunya

Catalunya en Comú-Podem = ICV-EUiA + Podemos + Barcelona en comú + Catalunya sí que es pot + Catalunya en Comú

3. In the same manner, to present the results of question 40 and 41 the different political parties or coalitions from the point of view of the groups that, as a result of the elections to the Congreso de los Diputados held on the 10th of November 2019. The results of this grouping are:

En Comú Podem – Guanyem pel Canvi = ICV-EUiA + Podemos + Catalunya sí que es pot + Barcelona En Comú + En Comú
Podem + Catalunya en Comú-Podem by vote recall

Junts per Catalunya – Junts = CDC + Democràcia i Llibertat + PDeCAT + Junts per Catalunya by vote recall

4. When the real base of the cross-tabulations is lower than 20 cases it is considered non-significant it is indicated with “**”.
